

FRANTIC IGNITION

RESIDENCY

2021

Although we are not running our full Ignition programme this year, we have an ambitious project to ensure we can still work creatively with young people nationwide and find a way to connect the artistic output of all the young people involved.

Each of our partner venues will be hosting a two-day residency for any young people aged 16- 24 years old. These will take place between **Friday 22nd October 2021** and **Sunday 31st October 2021**.

What does it involve?

The young people will work with our two Frantic practitioners and an Ignition graduate over the two days to explore the Frantic method of how we devise theatre and work physically. They will create their own short piece which will be filmed.

The ambition

There will be an overarching theme and starting point that unites and connects every location. The films will be edited together to produce a digital piece that will involve over 100 young people nationwide and screened in November.

Pathways

We hope this will be just the start of these young people's engagement with Frantic Assembly and will be offering more opportunities working with our partners next year that they will be able to participate in. We would also like to offer an opportunity for two young people in each residency to engage in further training with us in 2022.

What do your young people need to know?

- Our Ignition programme is completely **FREE**
- It is open to **EVERYONE** and is for **EVERYONE** aged 16-24 years old
- No experience is necessary
- The residency is **10am- 5pm** with an hour lunch break
